## BLACK RAPID RS-W1 WOMEN'S STRAP

After many requests Black Rapid has designed a strap specifically for women, which provides comfort and speed of the R-Strap whilst adding a bit of elegance to help blend with dress apparel during formal events. The design team adjusted the R-Strap's solid design pattern and developed a curved pattern specifically for the female form.

We are pleased to announce the release of Black Rapid's RS-W1 as the world's first camera strap designed specifically with the female in mind. It provides comfort, speed and durability along with graceful styling.
