

## High Definition Cleaning

For customers who wish to keep their kit in optimum condition, Alpine Innovations have an extensive and innovative range of HD micro fibre cleaning cloths perfect for camcorders, laptops and TV screens.

The Spudz HD Ultra micro fibre cleaning cloths are available in a wide range of colour designs and retail at £12.99 Inc VAT. The cloth measures 12" x 12". What makes Spudz so convenient is the design. Unlike other cleaning cloths, the Spudz cloth stays attached to the inside of the storage pouch. It will also stay conveniently attached to the back of your TV or monitor with an adhesive hook (which comes supplied).

The unique flip pouch design keeps the micro fibre cloth from sliding out of the pouch. Extremely convenient and versatile, just hand or machine wash with a mild detergent and hang out to dry. Then use it over and over again.

Alpine Innovations will also customise any of their leading products. A "private label" is one way for your company to market itself. Put your company identity on something unique and innovative to spread the word, one customer at a time.

Alpine Innovations is an American company who officially started in 2001 and since then has supplied a wide range of products to a long line of markets including photographic, audio visual, fishing, golf, outdoor, eyewear and medical.

For more information on Spudz or to become a stockist please contact the UK distributor JP Distribution on 01782 753304.
